Classe 100X16E

Eliot on BTicinon ohjelma, jolla Bticinon tuotteet liitetään internetiin. Näin Bticino laajenee esineiden internetiin, "Internet of things".

Kun ovipuhelin liitetään pilveen, se laajenee maailmanlaajuiseksi ovipuhelinjärjestelmäksi, ja samalla saadaan laaja valikoima toimintoja. Minimissään se, että nyt ovipuheli kulkee taskussasi.

Nyt uusi standardi on langattomuus

BTicino uudisti Classe 100-sarjan lisäämällä Wifi-yhteyden, suurentamalla videonäytön ja uudistamalla muotoilun. Lopputulos on valikoima video-ovipuhelimia ja ovipuhelimia, jotka ovat tyylikkäitä, helppoja asentaa ja tarjoavat asumismukavuutta uudella tasolla.

Sisäänrakennettu liitäntä kodin Wifi-verkkoon.

22 huoneistoa ilman lisäverkkolaitetta, laajentuen tuhansiin suunnitellen.

Liitettävissä Ios/Android-appiin **Door Entry CLASSE 100X App.**

Helppo uudistaa vanha ovipuhelinjärjestelmä. Yhteensopiva kaikkiin Bticino-ovipuhelinjärjestelmiin alkaen 2000.

Ei lisätöitä asentajalle, helppo asukkaalle.

Classe 100X yhdistettynä pilveen tuo ovipuhelimen taskuusi. Minne vain maailmassa- ainoa vaatimus, että Classe100X on kotiverkossasi, ja matkapuhelimessasi verkkoyhteys. Vaikka roamingina ulkomailla. Kaikki toiminnoa. Kutsu, ovenavaus, puhe, videokuva, lisätoiminnot.

Maximum freedom.
Always at ease,also
when away from the home.

Thanks to the **built-in Wi-Fi connectivity,**
Classe 100X gives the possibility of managing
various functions quickly and
safely using the smartphone.
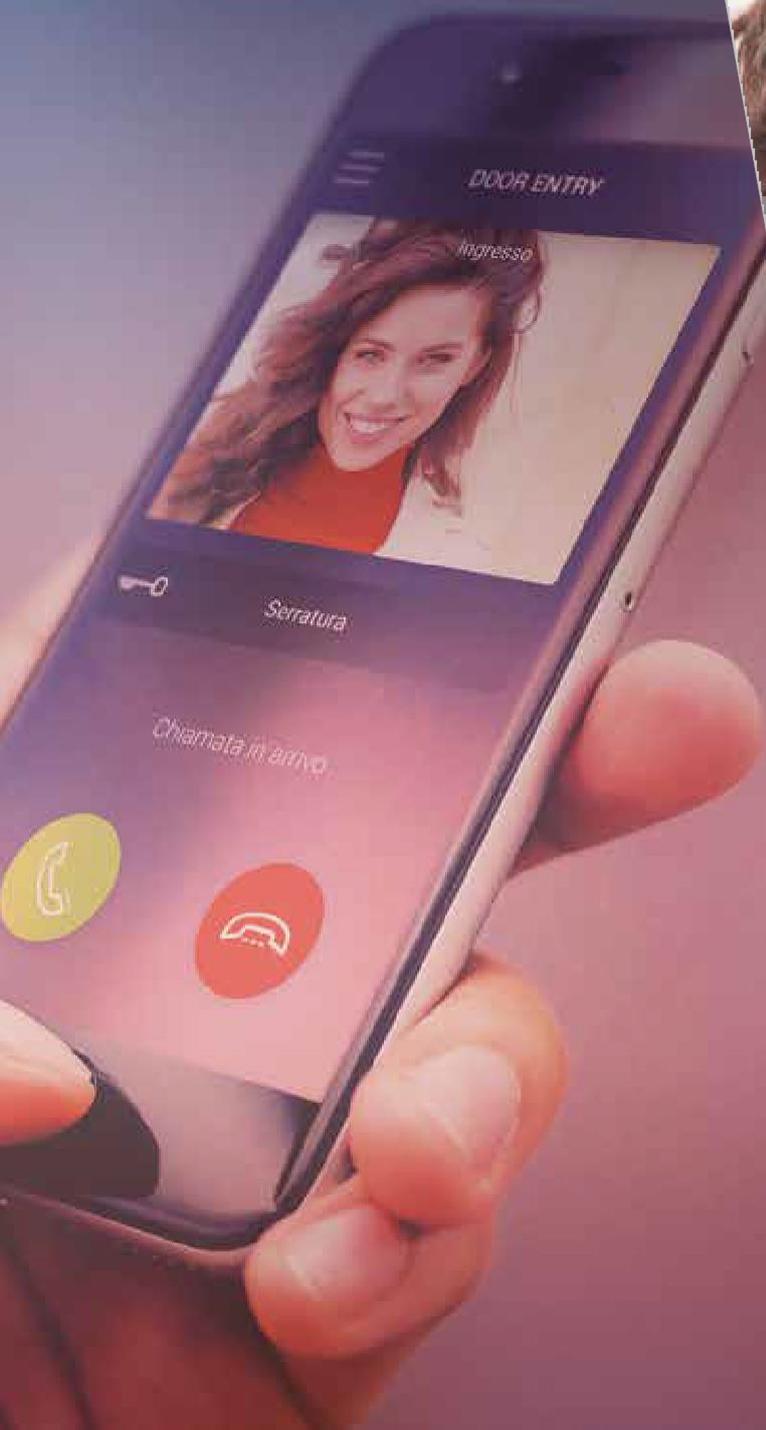

Full screen,
compact view.

The **5" display** always ensures great
visibility, irrespective of the type of
installation.

Thin and minimal.

Modern design combined with small thickness, lightness and solidity: this is the characteristic design of the new Classe 100.

Integration between physical and digital controls for better user experience.

New tilting control to answer and end the call, together with a range of touch controls for other functions.

Classe 100

vain- et tarvitse useaa
ovipuhelinta. Puhelimesi on
ovipuhelin.

Answer all the calls from anywhere in the world

When you are out, on holiday, in the office, you can answer the video door entry call wherever you are.

Open the home gate

You return home by car and cannot find your gate radio control?
No problem, you can open the gate with your smartphone.

Switch on the lights or water the garden

Even when you are out or on holiday, you can comfortably activate the garden watering and switch the lights on directly from your smartphone.

See what is happening outside the home

More security for your home. Using your smartphone you can activate the external and internal cameras connected to your video door entry system

Call home directly

Always keep in touch with anyone at home. The smartphone is an intercommunicating terminal with your video indoor unit.

Door Entry App

management

Call home
directly

Select the camera and
press to activate it

A simple touch for the end user

DOOR ENTRY is the App which allows, using the smartphone, to manage the video indoor unit **calls** locally and remotely or with a simple touch.
- open the gate.
- activate cameras.
- switch on the timed lights in the garden.
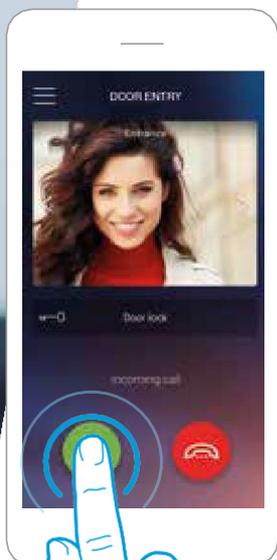

Answering the indoor
unit is as easy as
answering a normal
telephone call
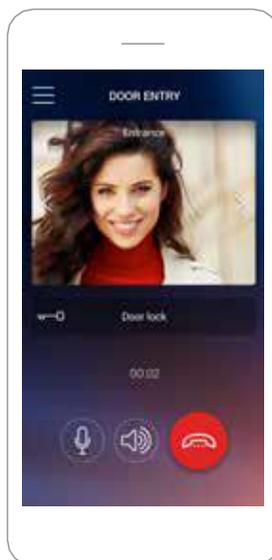

Call in progress

To open the door slide
the key to the right – you
will avoid opening the
door accidentally

Immediately connected and configured

After installing the App, a **guided procedure allows the association** between smartphone and Classe 100X16E in few steps.

1.

After the account has been created, go to the SETTINGS menu and select "CONFIGURATION".

2.

Using the smartphone, scan the QR Code that will appear on the video indoor unit screen.

3.

Select the home Wi-Fi network

4.
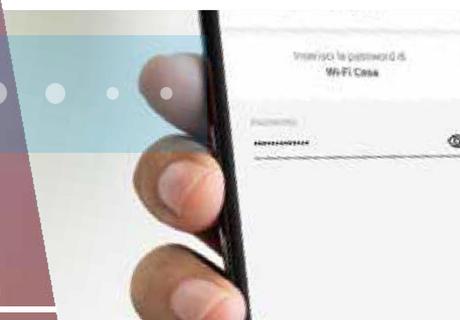

Once the password of the Wi-Fi network is entered, the App will search for the Classe 100 and will connect automatically, self-configuring.

The connection to the dedicated Cloud totally and safely automates the configuration on the home network (you do NOT need to configure your router). The video indoor unit transfers all the configuration of the 2 wires video door entry system (cameras, door locks, activations etc.) to the App. From Smartphone, using the App, you can always display the mobile devices associated to it and decide which to disconnect or cancel at any time.

BTICINO
Classe 100X

Open at integration
with connected
devices,
to extend your
user experience.

CONNECTED AND INTEROPERABLE

The integration with NETATMO Smart Indoor
and Smart Outdoor cameras, simplifies and
enhances the control and security of your
home. You will be able to view the video of
both your cameras BTicino and Netatmo,
answers the courier who rings your internal
unit and checks that he actually delivers the
package you are waiting for.
All this is now possible by one App:
DOOR ENTRY CLASSE 100X.

BTICINO
Door Entry
CLASSE 100X App

NETATMO
Smart Indoor camera

By installing or updating the **DOOR ENTRY CLASSE 100X App** on your smartphone, you can connect and view the images of Netatmo cameras on your video internal unit, both in new and existing systems.
No additional wiring / accessory is required: the association is done directly from the App in a few simple guided steps.

NETATMO
Smart Outdoor camera

EXAMPLES OF INTEGRATION AND USE
OF CLASSE 100X WITH NETATMO CAMERAS

NETATMO
Smart Outdoor
Camera

Directly from the DOOR ENTRY APP, in addition to the camera(s) and exte nal pushbutton panel, it also displays the extra NETATMO Wi-Fi cameras.

1. The DOOR ENTRY APP displays the NETATMO camera pictures

We can check if the dog is in the garden.

1.   2.

OK everything is quiet...

3.   4.

NETATMO
Smart Indoor
Camera

Thanks to the face-recogni ion technology, the NETATMO camera an recognise your children and report the information on the DOOR ENTRY A PP.

3. It displays whether your son has come home from school

My son should be at home now...

1.   2.

OK Marco is at home. The NETATMO camera has recognised him.

3.

2. Displays the actual delivery of the packages once the gate has been opened for the courier

Hello, I have a package to deliver.

1.

Hello, leave it in the garden in front of the house entrance. Thank you.

2.

3.

4.

5.

4. You can choose not to open remotely if there is already someone in the house.

Hi, I'm home.

1.

2.

Maria

3.

Maria is at home …. let her answer the call.

4.

5.

CLACK

6.

Perfect for renovations

In existing 2 WIRES systems you can update and replace your old indoor unit or video indoor unit with CLASSE 100X16E.
Thanks to the Wi-Fi connectivity you do not even need extra wiring.
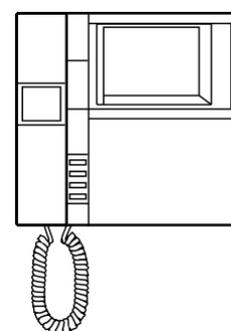

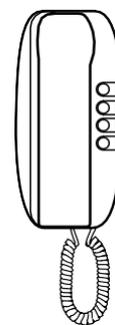

Classe 100X16E is the best solution available for renewing indoor unit

For the villa or for one&two-family context

Entrance panel	Classe 100X16E video indoor unit	Smartphone

Built-in connectivity for constant connection with the home.

No extra work for the installer; easier to use for the end user.

CLASSE 100X16E
Legal notes

To use the video door entry call repeat service on a smartphone, the customer must acquire the technical equipment which allows access to the Internet, on the basis of an agreement made by the customer himself with an ISP (Internet Service Provider). BTicino plays no part in this. The customer must install the Door Entry CLASSE 100X App on his smartphone so that he can use some services which BTicino supplies as extras to the normal basic functions of the CLASSE 100X16E video indoor unit. The services offered by means of the App require being able to interact with CLASSE 100X16E remotely and through the Internet.
In these cases the integration and good working between CLASSE 100X16E and App may depend on:
a) quality of the Wi-Fi signal;
b) type of access contract to the home internet;
c) type of data contract on the smartphone

When one of these 3 elements does not conform with the specifications required for product operation, BTicino accepts no responsibility for any faults. The product supports a VoIP streaming system. You must therefore check with your smartphone contract – data network – that it does not block it. We should also like to inform you that the service provided by BTicino – remote use via App – involves the use of data. The cost linked to data usage depends on the type of contract which the customer has with his ISP (Internet Service Provider) and is solely the customer's responsibility.
