

CLASSE 300

Classe 300- suurta ja koskettavaa

VIDEO-OVIPUHELIN LANGATTOMALLA YHTEYDELLÄ

The **CLASSE 300X13E** video internal unit allows you to transform every home into a connected home, which can be easily controlled in the home and at a distance using a smartphone.

Eliot is the BTicino program dedicated to connected objects (Internet of things) which identifies all those products or systems which, because they can connect to the Cloud, give added value in terms of functionality, information, interactions with the environment and use.

CLASSE 300X13E

The pictures shown on the display are exclusively for illustrational and promotional purposes.

MODERN
CONNECTED
SIMPLE

The facility of BTicino 2 wires technology with the advantage of the connection for more functions and extra services

CLASSE 300X13E is the connected video internal unit which combines modernity and innovation thanks to the communication between smartphone and video internal unit. The integrated Wi-Fi connectivity allows the connection (*) with your

smartphone and, thanks to the dedicated App, you can manage the video door entry calls in an innovative and functional way. Featuring a wide 7" Touch Screen display, it is ideal for all clients who care about technology and innovation, thanks to its unique design.

Always in contact with your home.

The possibility of managing the different functions using a smartphone is added to the installation simplicity offered by the CLASSE 300X13E. Both inside and outside the home you will be able to manage calls, answering machine, open the gate, activate the camera or operate the timed garden lights... Everything with a simple touch.

NOTE (*): for the connection you need a home Wi-Fi network with Internet access. See LEGAL NOTES section on page 27.

WHAT CAN YOU DO WITH CLASSE 300 X13E?

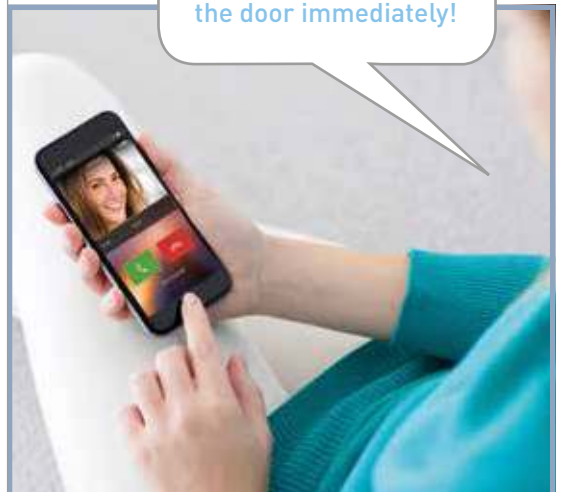

It is possible to manage various functions using the (free) App for Android and iOS smartphone

ANSWER COMFORTABLY FROM YOUR HOME SOFA

Absolute freedom of movement inside your home. You can answer the video door entry call from any room of your home.

Hi Anna, come in, I'll open the door immediately!

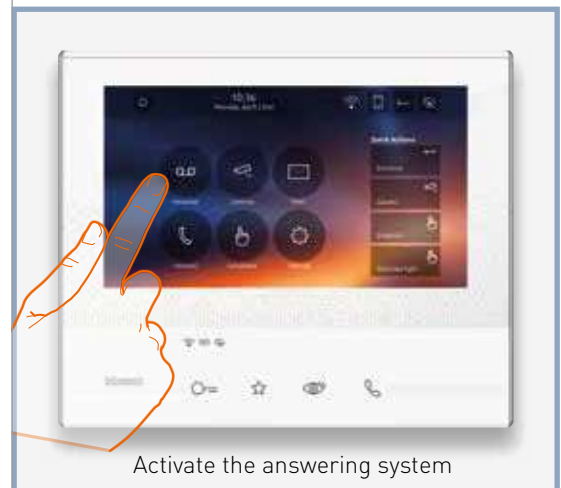

ANSWER THE CALL WHEN YOU ARE OUT OF YOUR HOME

When you are out, on holiday, in the office, you can answer the video door entry call wherever you are.

ACTIVATE, DEACTIVATE AND ACCESS THE VIDEO DOOR ENTRY ANSWERING MACHINE MESSAGES

Before going out, if you don't want to miss a call, switch on your video door entry answering system. Your smartphone always lets you know who is looking for you.

Activate the answering system

NOTE: using the smartphone it is possible to activate and deactivate the video door entry answering machine and access the previous messages.

WHAT CAN YOU DO WITH CLASSE 300X13E?

CALL HOME DIRECTLY

Always keep in touch with anyone at home. The smartphone is an intercommunicating terminal with your video internal unit.

Hi Anna, can you see if my purse is in the living room?

OPEN THE HOME GATE WHEN YOU DO NOT HAVE YOUR RADIO CONTROL

You return home by car and cannot find your gate radio control? No problem, you can open the gate with your smartphone.

NOTE: all the door locks connected to your 2 wires video door entry system can be controlled by smartphone.

SEE WHAT IS HAPPENING AT HOME

More security for your home. Using your smartphone you can activate the external and internal cameras connected to your video door entry system.

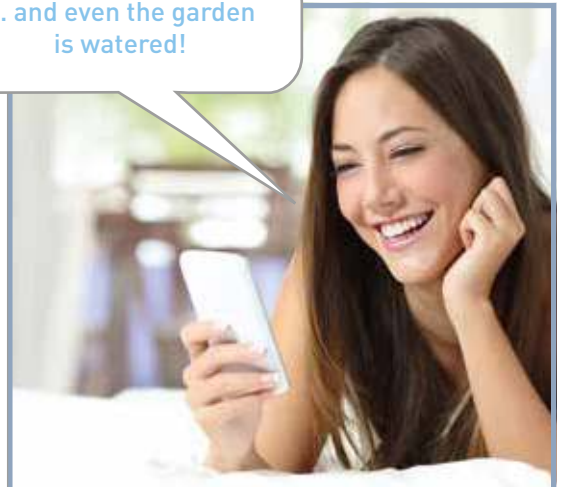

NOTE: all the cameras connected to your 2 wires video door entry system can be controlled by smartphone.

SWITCH ON THE LIGHT OR WATER THE GARDEN

Even when you are out or on holiday, you can comfortably activate the garden watering and switch the lights on directly from your smartphone.

... and even the garden is watered!

NOTE: the timed actuators connected to your 2 wires video door entry system can be controlled by smartphone.

2 wires standard installation

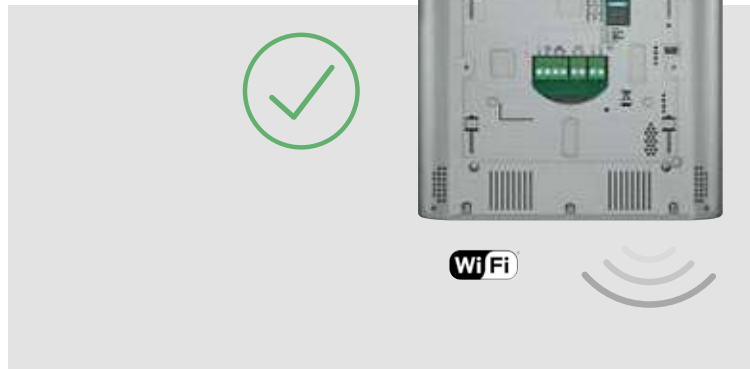

Thanks to the integrated Wi-Fi connectivity, Classe 300X13E does not require work on the walls and follows the **same installation rules** as a "normal" 2 wires video internal unit.

THE ADVANTAGES

CLASSE 300X13E
DOES NOT CHANGE
THE INSTALLATION RULES

Forget installation complexity and configuring an Ethernet network and keep the simplicity of 2 wires connection. Everything stays the same thanks to the Wi-Fi technology integrated in the video internal unit.

Simple and intuitive configuration

The configuration requires no IT skills. You must only configure the classic 2 wires system parameters (entrance panel and internal unit SCS addresses, etc.). Your customer manages all the configurations

of the Wi-Fi network and the App independently and intuitively. If necessary he can call the BTicino after-sales service directly by means of the Help button integrated in the application.

DOOR ENTRY APP

DESIGNED
FOR THE
FINAL USER

DOOR ENTRY is the App which lets you, using your smartphone, manage the video internal unit calls locally and remotely or with a simple touch open the gate, activate the cameras and switch the garden timed lights on. Configuring the App needs just a few steps and, thanks to the BTicino Cloud, the remote connection is totally automated and managed with the maximum level of security.

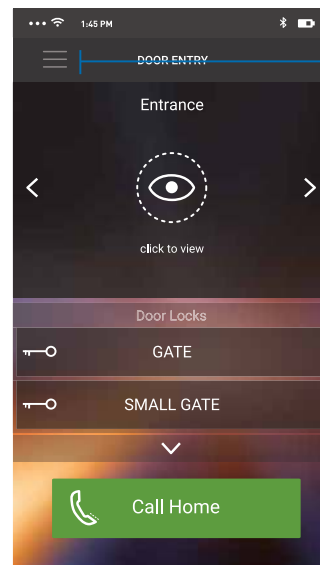

Scan the QR Code with your smartphone and download the Android App.

Scan the QR Code with your smartphone and download the iOS App.

Home Page screen

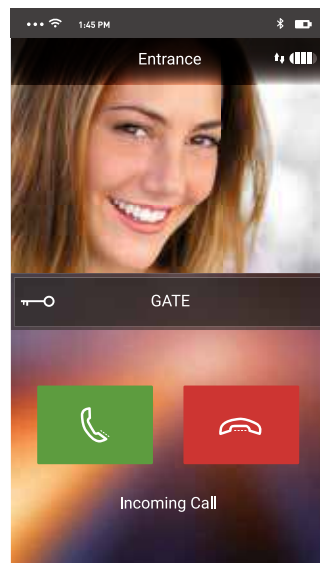

App settings

Camera display

Door lock management

Call home directly

Incoming call screen

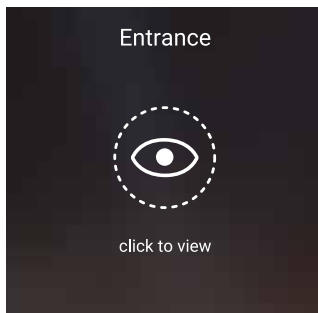

Call management

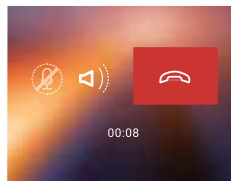

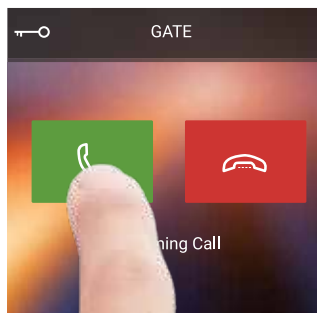

User interface designed starting from the most commonly used functions.

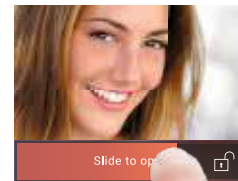

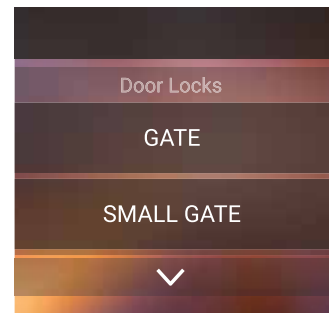

Select the camera and press to activate it

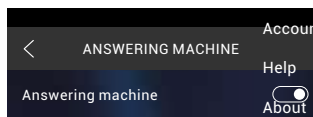

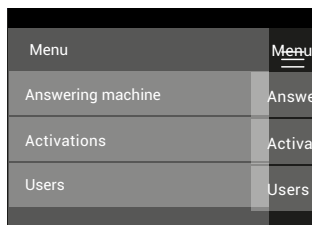

Answering the internal unit is as easy as answering a normal telephone call

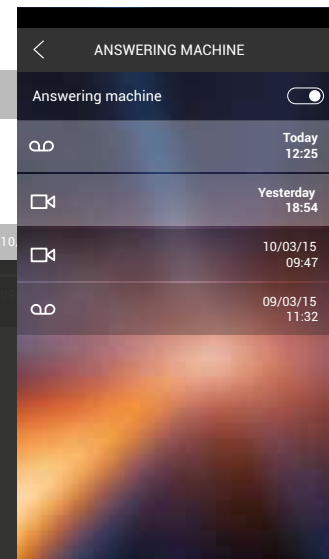

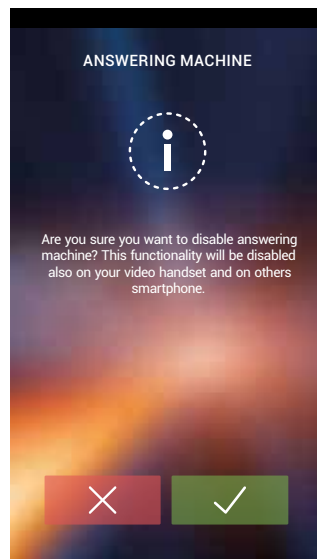

To open the door slide the key to the right – you will avoid opening the door accidentally

It is possible to activate and deactivate the video door entry answering machine directly with the App

Touch to display the recorded message

IMMEDIATELY CONNECTED AND CONFIGURED

After installing the App, a guided procedure allows the association between smartphone and CLASSE 300X13E in 3 simple steps.

1 Once the Wi-Fi connection is activated select the network you want to connect to

IMMEDIATELY

2 Enter your Wi-Fi network password

3 Once the configure key is pressed, the App will search for the Classe 300X13E and will connect automatically, self-configuring

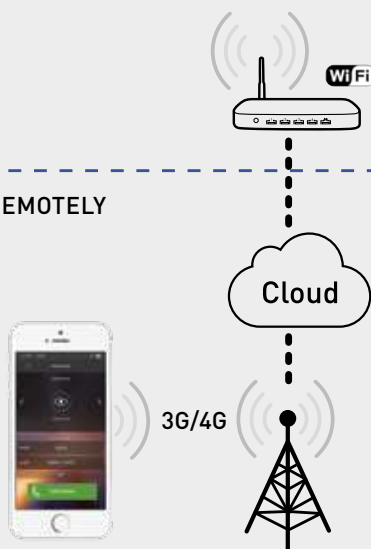

LOCAL

The connection to the dedicated Cloud totally automates the configuration on the home network (you do NOT need to configure your router).

The video internal unit transfers all the configuration of the 2 wires video door entry system (cameras, door locks, activations etc.) to the App and updates automatically after each modification.

REMOTELY

On the video internal unit you can always display the mobile devices associated to it and decide which to disconnect or cancel at any time.

PERFECT TO REPLACE YOUR OLD 2 WIRES INTERNAL UNIT

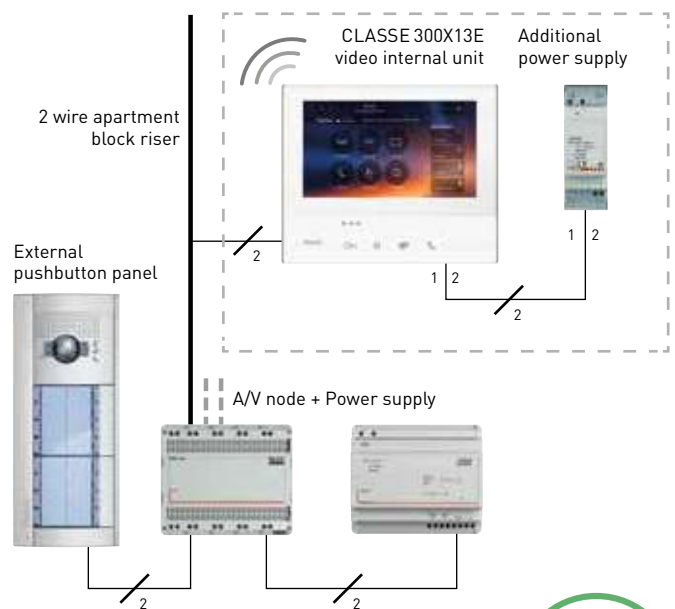

Classe 300X13E is the best solution available for renewing your internal unit.

In existing **totally 2 wires** systems you can update and replace your old internal unit (*) or video internal unit with CLASSE 300X13E. Thanks to the Wi-Fi connectivity you do not even need extra wiring.

Villa or single-family context

Apartment block or multi-family context

In multi-family systems (apartment blocks) you need the additional power supply of the CLASSE 300X13E video internal unit.

Also suitable for renewing the entire system.

CLASSE 300X13E has 2 wires technology. Unlike solutions based on Ethernet/IP systems, the 2 wires technology is the **best solution for refurbishments** because a pair of existing wires can be used.

(*) Will be transferred the audio call only.

The pictures shown on the display are exclusively for illustrational and promotional purposes.

CLASSE 300

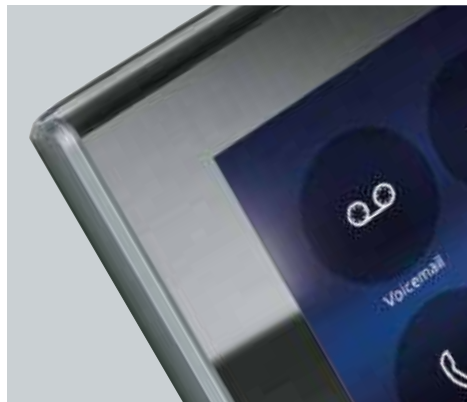

A STYLISH CHOICE

Elegant design and modern technology

CLASSE 300 is the range of handsfree video internal units with a wide **7" TOUCH SCREEN** display enhanced by the glossy finish glass effect.

The curved and metalised profile with rounded corners helps to cancel the perception of thickness giving a **UNIQUE STYLISTIC YIELD**.

The main functions can be activated by means of **TOUCH SENSITIVE** keys placed in an easily identifiable area with **TACTILE GUIDE** for easier recognition.

CLASSE 300 has been awarded this prestigious international recognition confirming BTicino's capacity in combining technology and design.

CLASSE 300 A STYLISH CHOICE

CLASSE 300X13E combines unique and innovative style with advanced technology which allows absolute freedom, thanks to the Wi-Fi connection.

CLASSE 300 is available in two finishes, light and dark. It can be wall and table installed.

Light finish

Dark finish

Table-mounted installation with accessory supporting frame 344632

The **TOUCH SENSITIVE** capacity keys which control the main video door entry functions come with tactile guides for easier recognition.

A SIMPLE APPROACH TO EVERYDAY GESTURES

Door lock release

Camera activation

Favourites which can be configured

Handsfree communication

Intuitive access to all functions

Allows access to the visitors you want

Answer your visitor calls

You can adjust the screen settings and select from different backgrounds and ring tones

See what is happening outside: you can see the pictures from the external pushbutton panel camera or from the cameras connected to your system

Use the CLASSE 300 to communicate with the other rooms of your home or with other homes

You can decide that the CLASSE 300 opens the door automatically when you receive a call (you can activate and deactivate the function when you want)

If you need peace and quiet you can silence the CLASSE 300 and reactivate it when you want

You can activate other functions which are connected to your system, such as the staircase lights or the locks of other gates

Leave a message with the NOTE function

Activate the answering system function (only CLASSE 300X13E - CLASSE 300V13M), to record a film clip of the visitor who was looking for you. When you are out, you can record a message for people looking for you.

CLASSE 300X13E

Legal notes

To use the video door entry call repeat service on a smartphone, the customer must acquire the technical equipment which allows access to the Internet, on the basis of an agreement made by the customer himself with an ISP (Internet Service Provider). BTicino plays no part in this. The customer must install the Door Entry App on his smartphone so that he can use some services which BTicino supplies as extras to the normal basic functions of the Classe 300X13E video internal unit. The services offered by means of the App require being able to interact with Classe 300X13E remotely and through the Internet. In these cases the integration and good working between Classe 300X13E and App may depend on:

- a) quality of the Wi-Fi signal
- b) type of access contract to the home Internet
- c) type of data contract on the smartphone

When one of these 3 elements does not conform with the specifications required for product operation, BTicino accepts no responsibility for any faults. The product supports a VoIP streaming system. You must therefore check with your smartphone contract – data network – that it does not block it. We should also like to inform you that the service provided by BTicino – remote use via App – involves the use of data. The cost linked to their use depends on the type of contract which the customer has signed with an ISP (Internet Service Provider) and is his responsibility.
